Python

Da Vinci Resolve

Javascript

HTML / CSS

## ABOUT ME

I'm a seasoned 3D artist with over six years of experience in Blender. I have successfully collaborated with clients and teams to craft visually stunning content that captures attention and imagination. My portfolio spans a diverse array of projects, from short films and TV commercials to promotional and educational videos for kids.

As a self-taught developer, I've also mastered the art of streamlining workflows. I create custom scripts and addons for Blender (Python), significantly boosting the efficiency of our production pipeline.

For me, It's not just about making art—it's about making the process smarter, faster, and more creative along the way.

## WORK EXPERIENCE

July 2024 - Present
